Daily Progress Journal

Names : Daniël Groen, Daniëlle Bijl, Evelyne van Oers, Ruben van Heusden
Project : Picompany 1

Day	Activities
07-06-2017	- First meeting at PiCompany / kick Off - Brainstorming/Start of making the longlist - Getting familiar with a small test part of the dataset and learning the structure of the data
08-06-2017	- **Basic reading in of data = complete** - Progress on making the longlist - Complete dataset retrieved - Working on slides for friday presentation - Setting up github repository
09-06-2017	- Uitvoering presentatie UvA - doorwerken aan longlist
10-06-2017	
11-06-2017	
12-06-2017	- Determine shortlist with PiCompany - Set weekly goal: START/STOP/CONTINUE and skill classification techniques - **Implement Naive-Bayes method for START/STOP/CONTINUE classification**

13-06-2017	- Continuation on implementation of Naive Bayes Classification - LDA classification for topic analysis
14-06-2017	- NB add ngrams, - get LDA working in scikit learn
15-06-2017	- Work on presentation, - Confusion Matrix plotting, - NB Stemming
16-06-2017	- Work on presentation
17-06-2017	- Look into language filtering
18-06-2017	- Work on report, - Filter languages, - Implement NB in the PiCompany format
19-06-2017	- Separate and list misclassified feedback for analysation. - Implement other NB versions in the PiCompany format. - Start with LDA evaluation.
